

2019 Recommended Spring flow release from Lewiston Dam for a "Wet" Water Year

Note: Hydrograph shows daily average flow releases and instantaneous flows. The table on the reverse side shows the daily average flow schedule and the daily peak instantaneous release.

WY2019 Wet – **Recommended** Spring Flow Release Schedule

Date	Daily Avg. Release*	Peak Release	Date	Daily Avg. Release*	Peak Release	Date	Daily Avg. Release*	Peak Release
14-Apr	442	1050	24-May	3563	4500	3-Jul	1746	1850

23-May	2729	2900	2-Jul	1829	1950	11-Aug	450	450

*Flow release schedule shown here provides daily average and instantaneous peak values rounded to the nearest 50 cfs.

Objectives for the 2019 “Wet” WY: Transport sediment and scour fine sediment from the channel and deposit it on floodplains; provide flow and temperatures for juvenile salmonid rearing and enable adult holding and spawning habitat; discourage riparian plant growth within the channel; distribute Chinook fingerlings released from Trinity River Hatchery
